## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 48-67 and 70-84, drawn to a cosmetic/pharmaceutical comprising and admixture of vitamin A, vitamin C, vitamin E, zinc and selenium in the form of sodium selenite, selenocysteine or selenoyeast, wherein the vitamin A, vitamin C, vitamin E, zinc and selenium, in the form of sodium selenite, selenocysteine or selenoyeast, are the only active agents in the composition, classified in class 514, subclass 904.
- II. Claims 68 and 69, drawn to a regime or regimen for promoting hair growth and/or retarding hair loss, and/or for increasing the mean diameter of strands of hair and/or decreasing the heterogeneity thereof, and/or for increasing hair density, and/or for improving the quality and/or appearance of head of hair, and/or for inducing repigmentation of the hair, comprising administering to an individual in need of such treatment, for such period of time as required to elicit the desired effect, a thus effective amount of intimate admixture of vitamin A, vitamin C, vitamin E, zinc and selenium, in the form of sodium selenite, selenocysteine or selenoyeast, are the only active agents in the composition, classified in class 424, subclass 401.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product. For instance, in US 6156899, Galey et al. teach a method for inducing/stimulating hair growth and/or retarding hair loss comprising the administration of N-aryl-2-hydroxyalkylamido compounds; in US 6149933, Nelson teaches a method for inducing repigmentation of the hair comprising the administration of a composition comprising copper salt, para-aminobenzoic acid or salts thereof, pantothenic acid or salts thereof, and vitamin B; in US 5068315, Buultjens et al. teach a method of increasing the diameter of the hair strand, and/or lengthening the hair strand, and/or preventing, retarding, or arresting the process of hair loss comprising the administration of polypeptides; and, in US 5827510, Mesquitta teaches a method of improving the quality of hair comprising the administration of a composition comprising castor oil, water and glycerin.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Art Unit: 1654

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
